The need for accurate and up-to-date statistical information is vitally important in times of rapid and accelerating change. I am therefore pleased to introduce *Justice Statistics Ontario*, produced by the Provincial Secretariat for Justice in response to many requests for a comprehensive sourcebook of statistical data about the operation of the justice system in Ontario.

The compilation of these data was made possible through the efforts of the Ministries in the Justice Policy Field and the Ministry of Treasury and Economics, the Ministry of Consumer and Commercial Relations, the Ministry of the Attorney General, the Ministry of Correctional Services, and the Ministry of the Solicitor General.

We are also grateful to the staff of the Canadian Centre for Justice Statistics, Correctional Services Canada, and the Ministry of Community and Social Services for their cooperation and prompt attention to our requests.

We trust this publication will be of particular benefit to policy analysts and planners within governments, and to researchers and teachers within the education community. Above all we hope that this publication will add to the public knowledge about the justice system in Ontario.

Gord Walker, Q.C.
Minister

Appendix	Data Sources	187
----------	--------------	-----

Introduction and Highlights

Introduction

This book attempts to bring together in one reference document the most pertinent and current justice statistical data available about Ontario. The need for valid and reliable information is especially important in times of rapid and accelerating change. The information provides an integral and vital component for rational decision making both for the short and long term.

Planning for this publication commenced early in 1984. Input from the Ontario Justice Ministries was sought via the Justice Statistics Advisory Committee. This committee, formed by the Provincial Secretariat for Justice, includes Mrs. D. Gonsalves-Sing of the Ministry of the Attorney General, Mr. R. Rintoul of the Ministry of the Solicitor General, Mr. S. Girling of the Ontario Provincial Police, Ms. J. Kajganich of the Ontario Police Commission, Mr. P. Madden and Mr. A. Birkenmayer of the Ministry of Correctional Services, Mr. W. MacDonald formerly of the Ministry of Consumer and Commercial Relations, and Ms. J. Rodegard of the Ministry of Treasury and Economics. The mandate of the Committee is to guide decisions about a) what information is needed based on the use made of earlier editions and on changing Ministry priorities and, b) whether information is available and how best to access it. The overall development and co-ordination of the project was supervised by Mr. R. Harris of the Secretariat staff.

The feedback received from returned "User Response" questionnaires inserted in the four earlier editions, (see inside front cover) provided many suggestions for improvement. Above all, the many completed questionnaires from various sectors pointed to the need for continuation of this publication, often citing that it represents the only available compendium of justice statistics for the province.

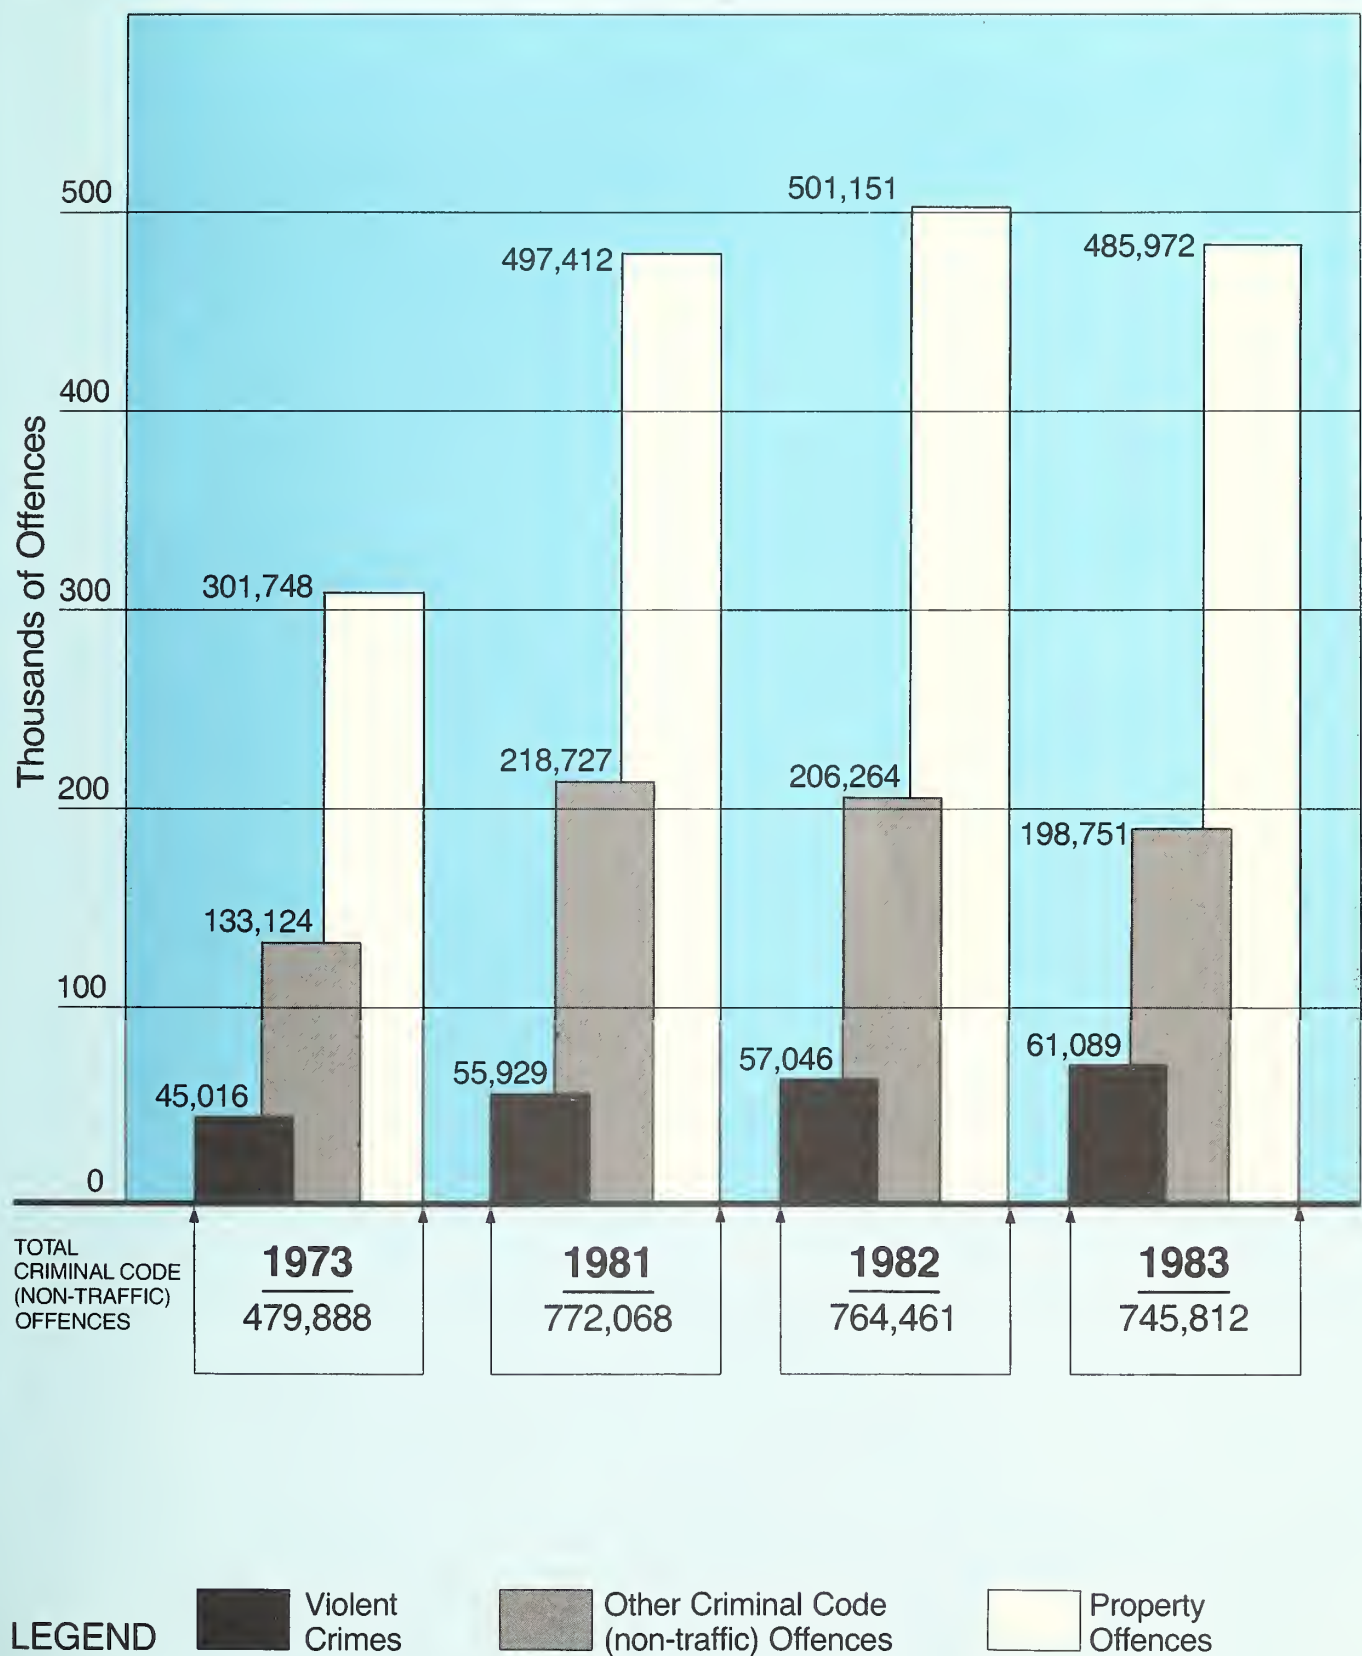

Many problems in data uniformity and units of count have still not been overcome. However, it is hoped that this source book will help reduce some of the inconsistencies among the data. Further, with the current Federal/Provincial efforts in support of the Canadian Centre for Justice Statistics, the long-term will see major improvements in justice statistics and information throughout Canada.

Highlights

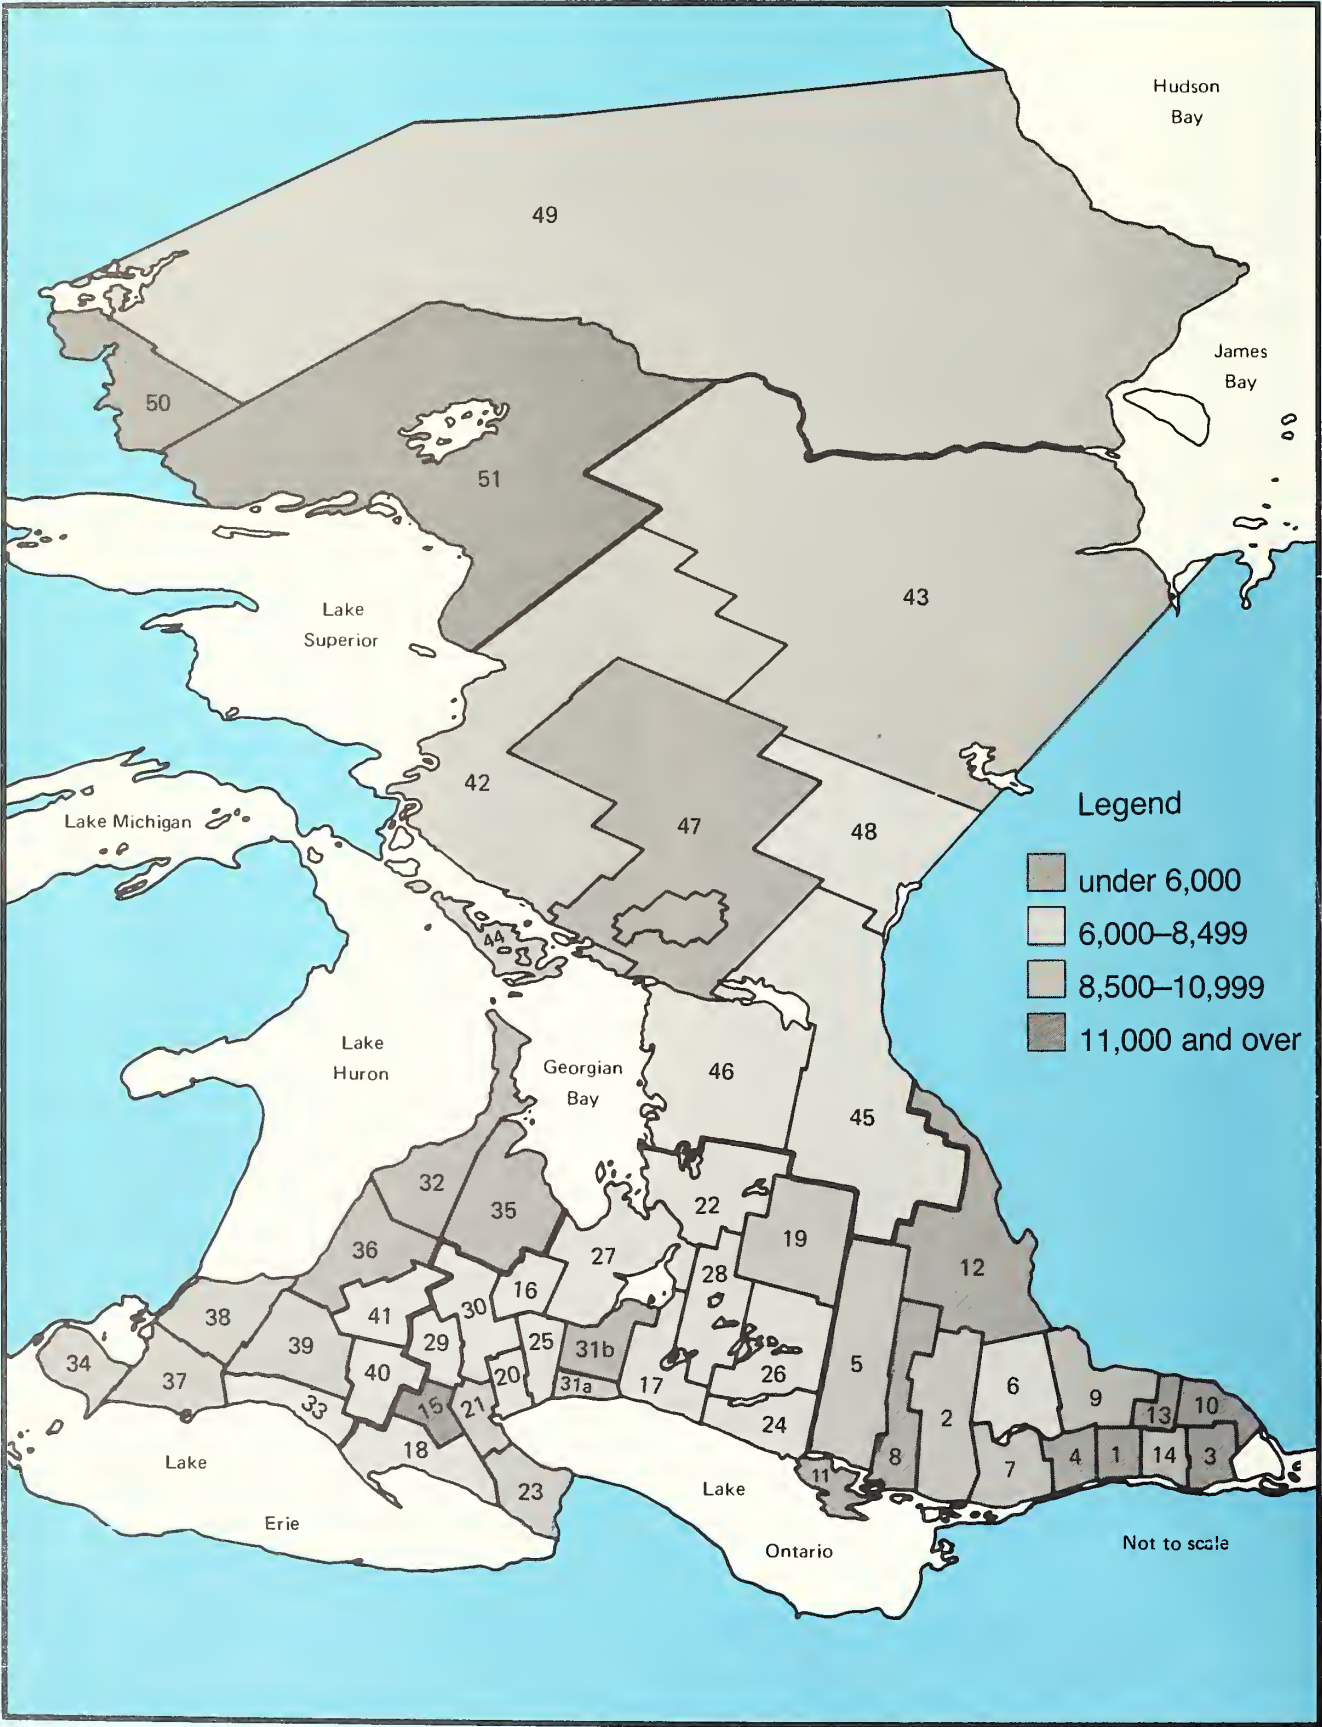

The following charts and maps highlight Ontario's crime rates in comparison to rates in the other provinces. They also illustrate some of the changes which have been occurring in Ontario in the last few years: For example:

- Criminal Code offences (non-traffic) in Ontario peaked in 1981 but declined in each of the last two years.
- The counties and districts of Thunder Bay, Rainy River and Brant had Ontario's highest rates for Criminal Code offences (non-traffic) in 1983.
- Ontario's rate for violent offences in 1983 was 692.9 per 100,000 population. The rate was higher than the eastern provinces and lower than the western provinces.
- The counties and districts of Thunder Bay, Kenora, Manitoulin, Kent and Brant had Ontario's highest rates for violent offences in 1983.
- Homicide offences in Ontario have increased in Ontario each year since 1980. However, the number in 1983 was still less than the number in 1975.
- Ontario's rate for property offences in 1983 was higher than the eastern provinces and lower than the western provinces.
- The counties and districts of Rainy River, Thunder Bay and Brant had Ontario's highest rates for property offences in 1983.
- In 1983, of Ontario's economic regions, the highest rate for charges received in Provincial Court per 100 population was Central Ontario. Within this, Metropolitan Toronto stands out for its high rate.
- Since 1979/80, the number of sentenced admissions to imprisonment has increased while the number of persons placed on probation has remained relatively constant.
- The number of juvenile offenders in Ontario remained relatively constant between 1974 and 1983.

Criminal Code Offences in Ontario, 1973, 1981, 1982, 1983

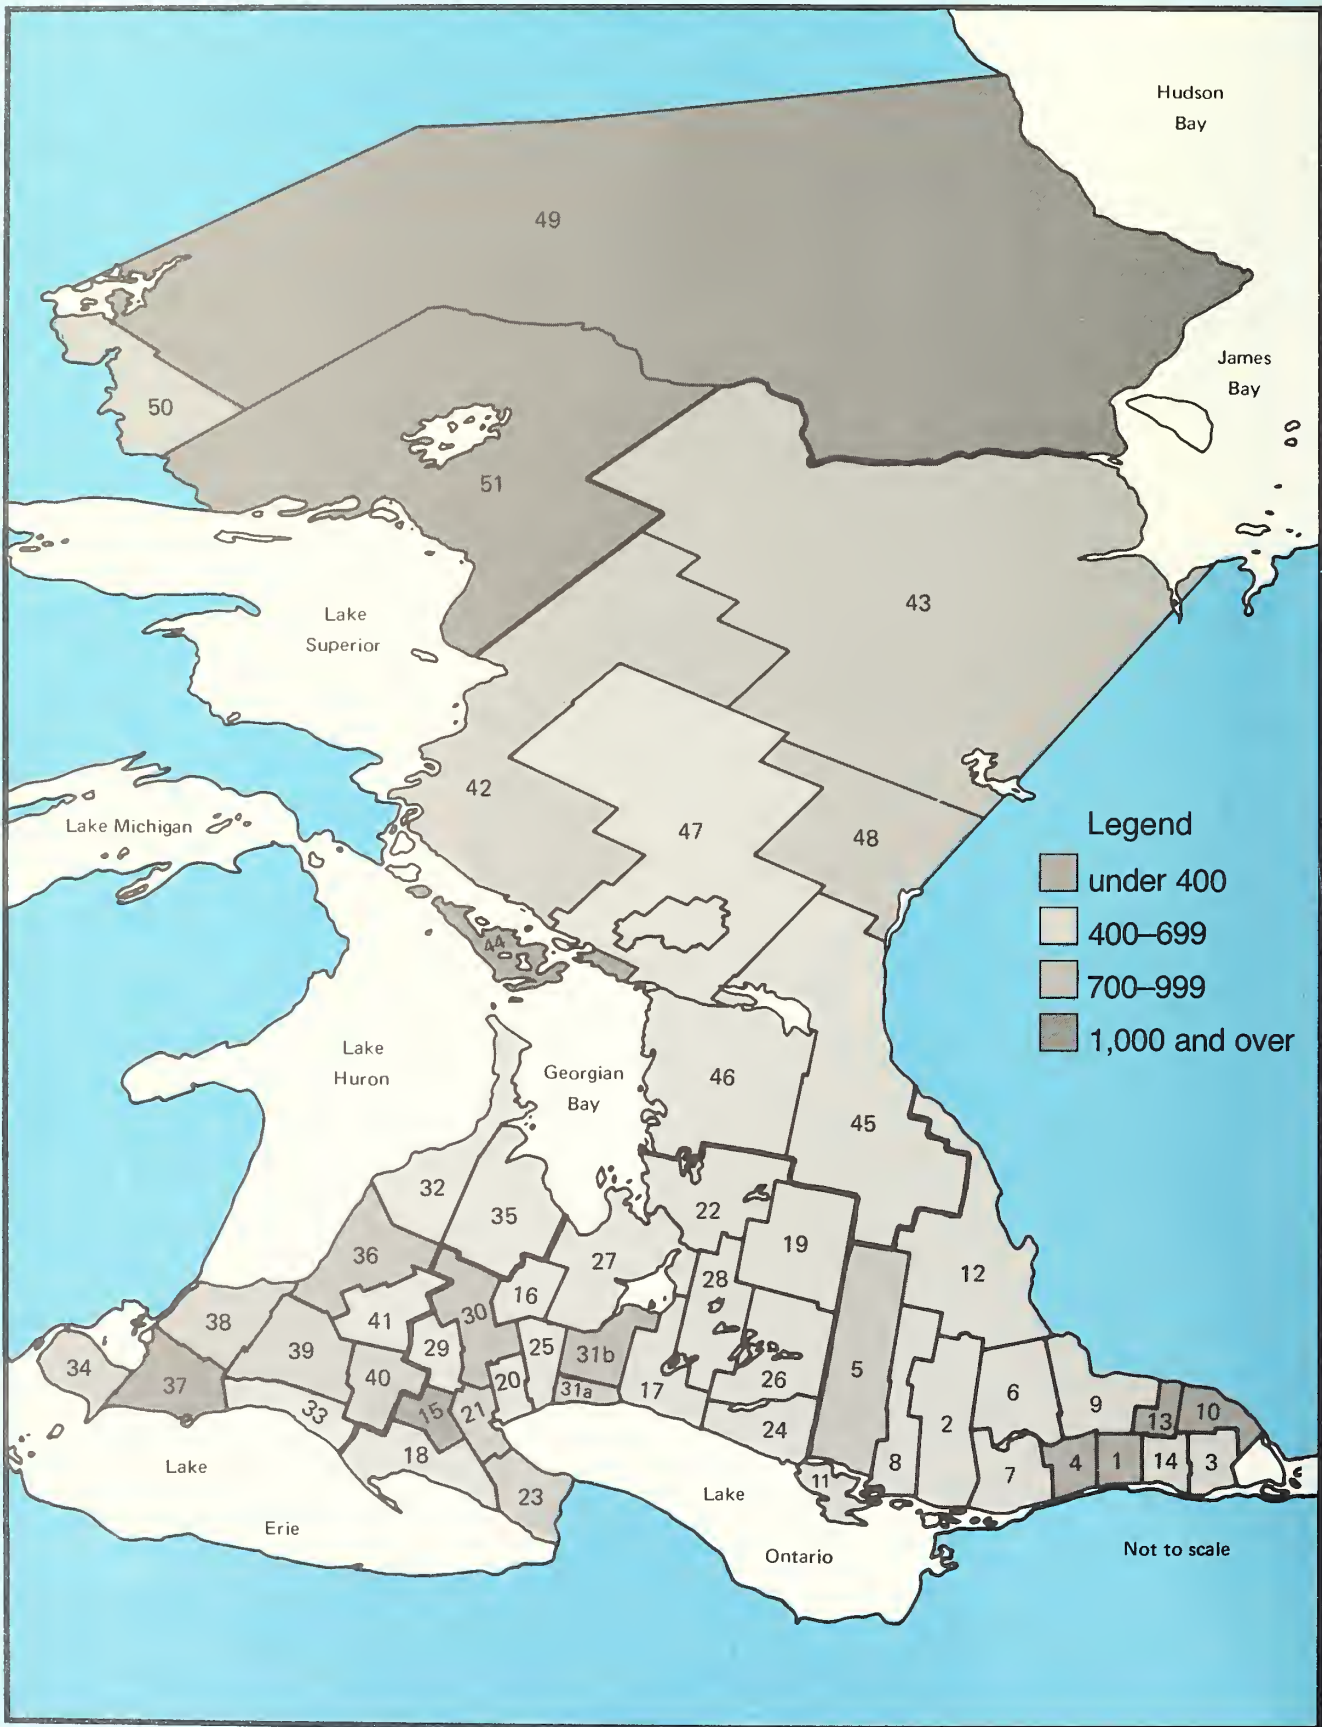

Rate of Total Criminal Code (non-traffic) Offences per 100,000 Population for Ontario's counties, regions and districts – 1983

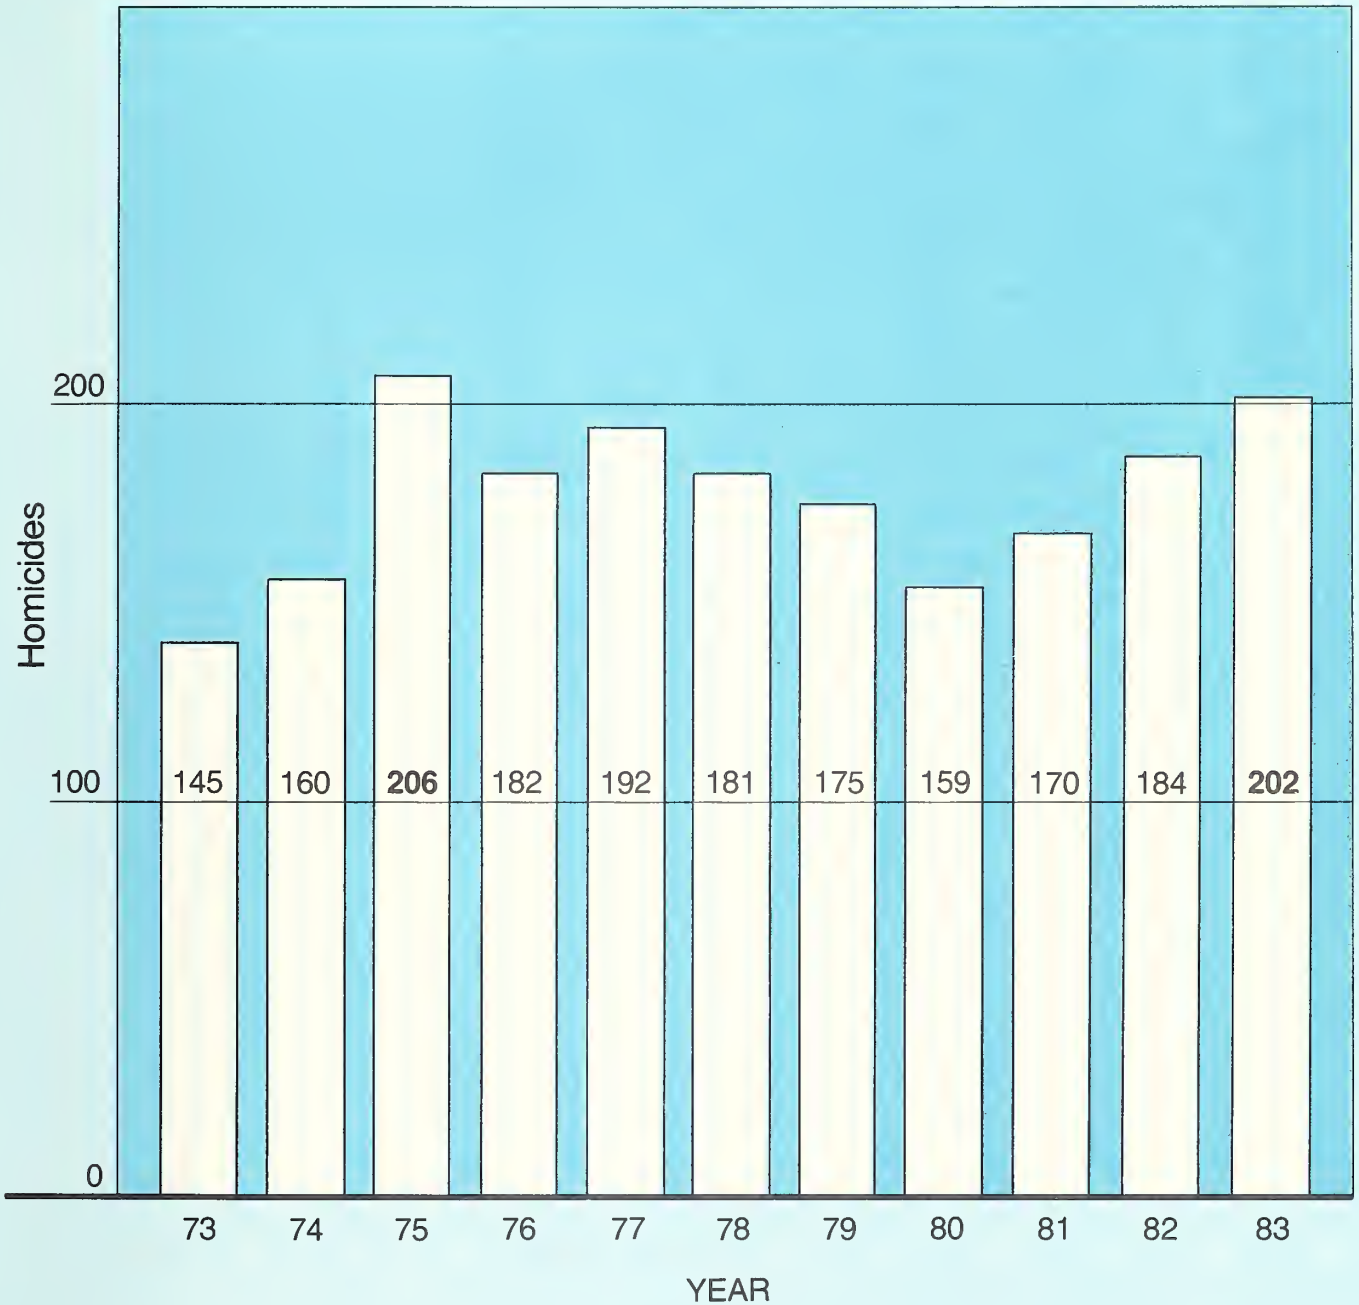

Comparative Rates per 100,000 Population for Violent Offences Canada and the Provinces – 1983

Rate of Violent Crime per 100,000 Population for Ontario's counties, regions and districts – 1983

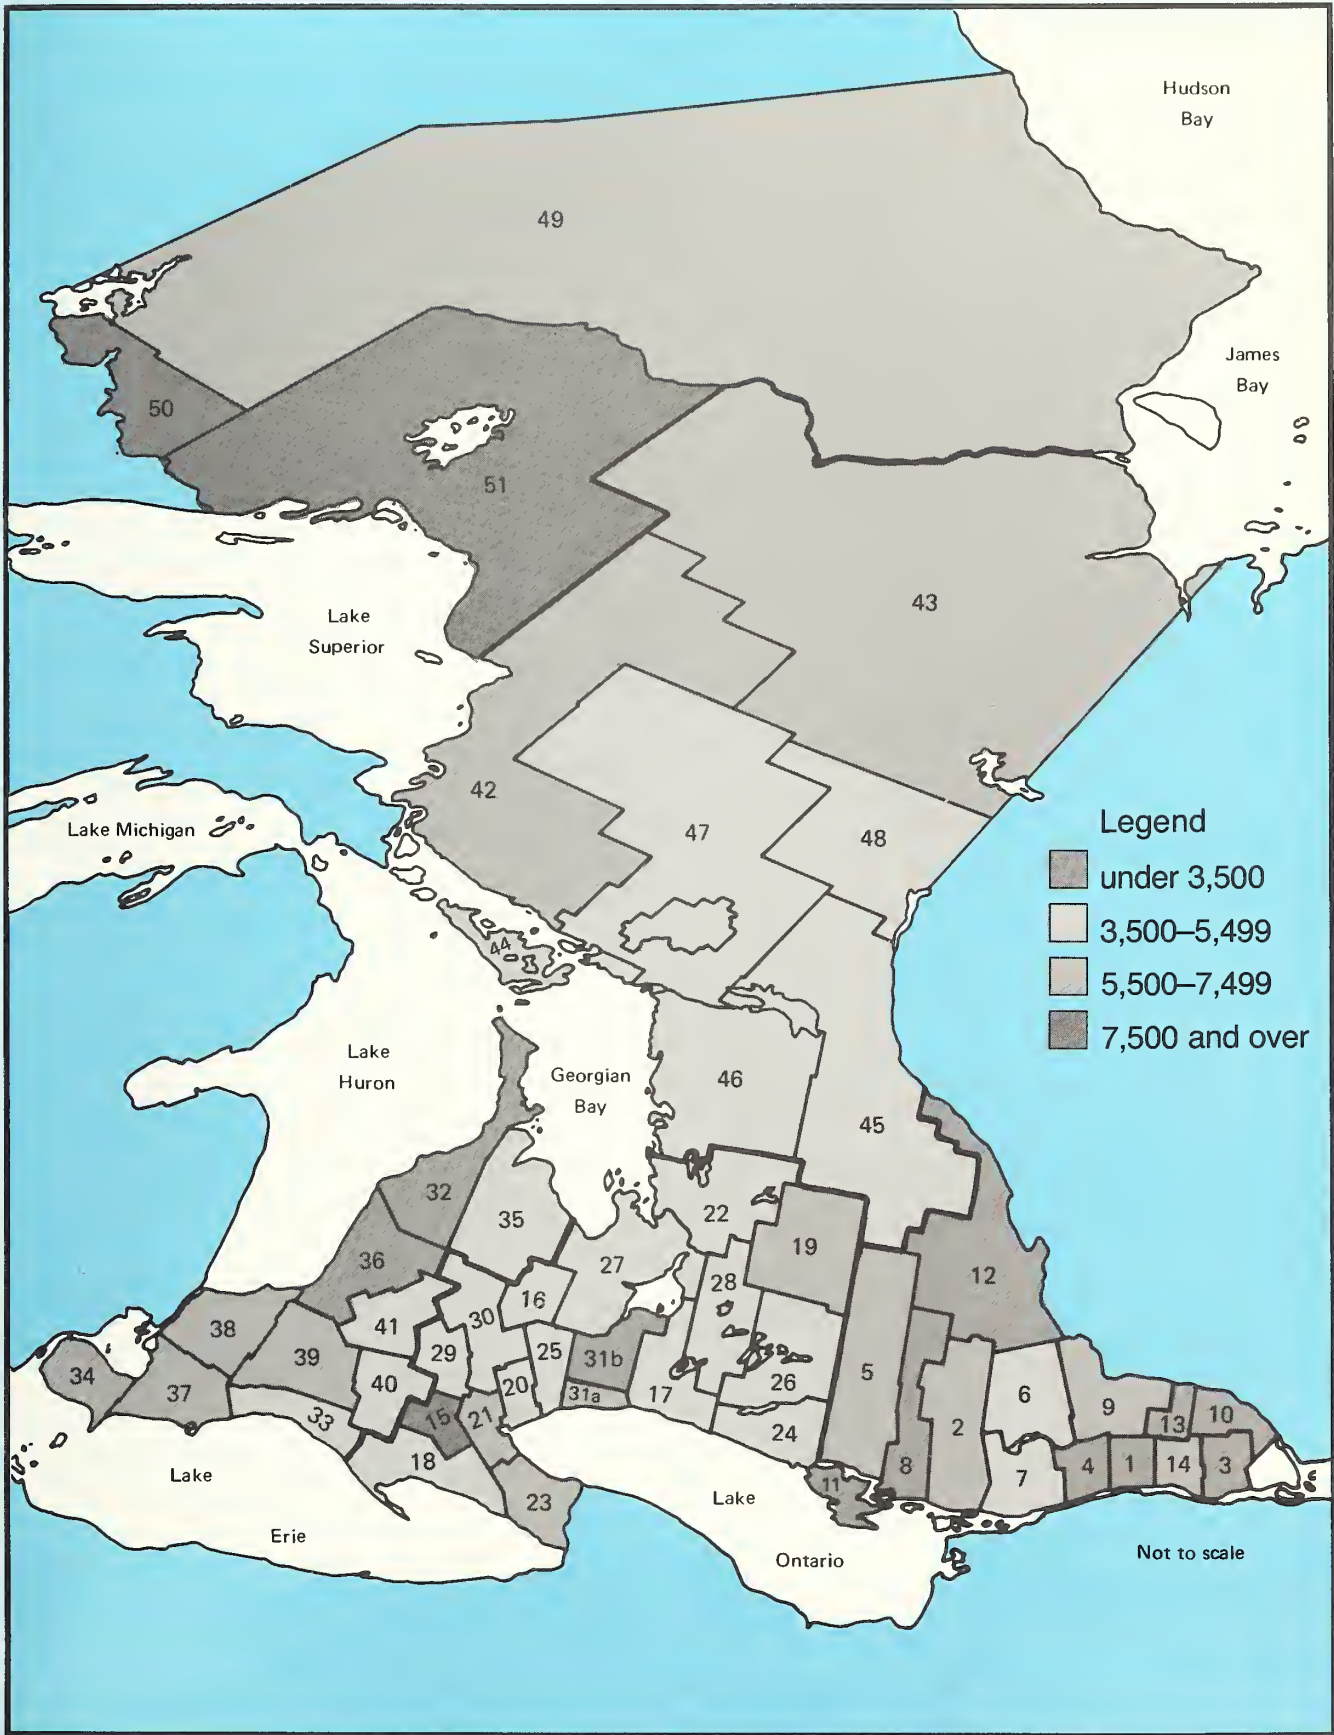

Actual Homicide Offences in Ontario, 1973–1983

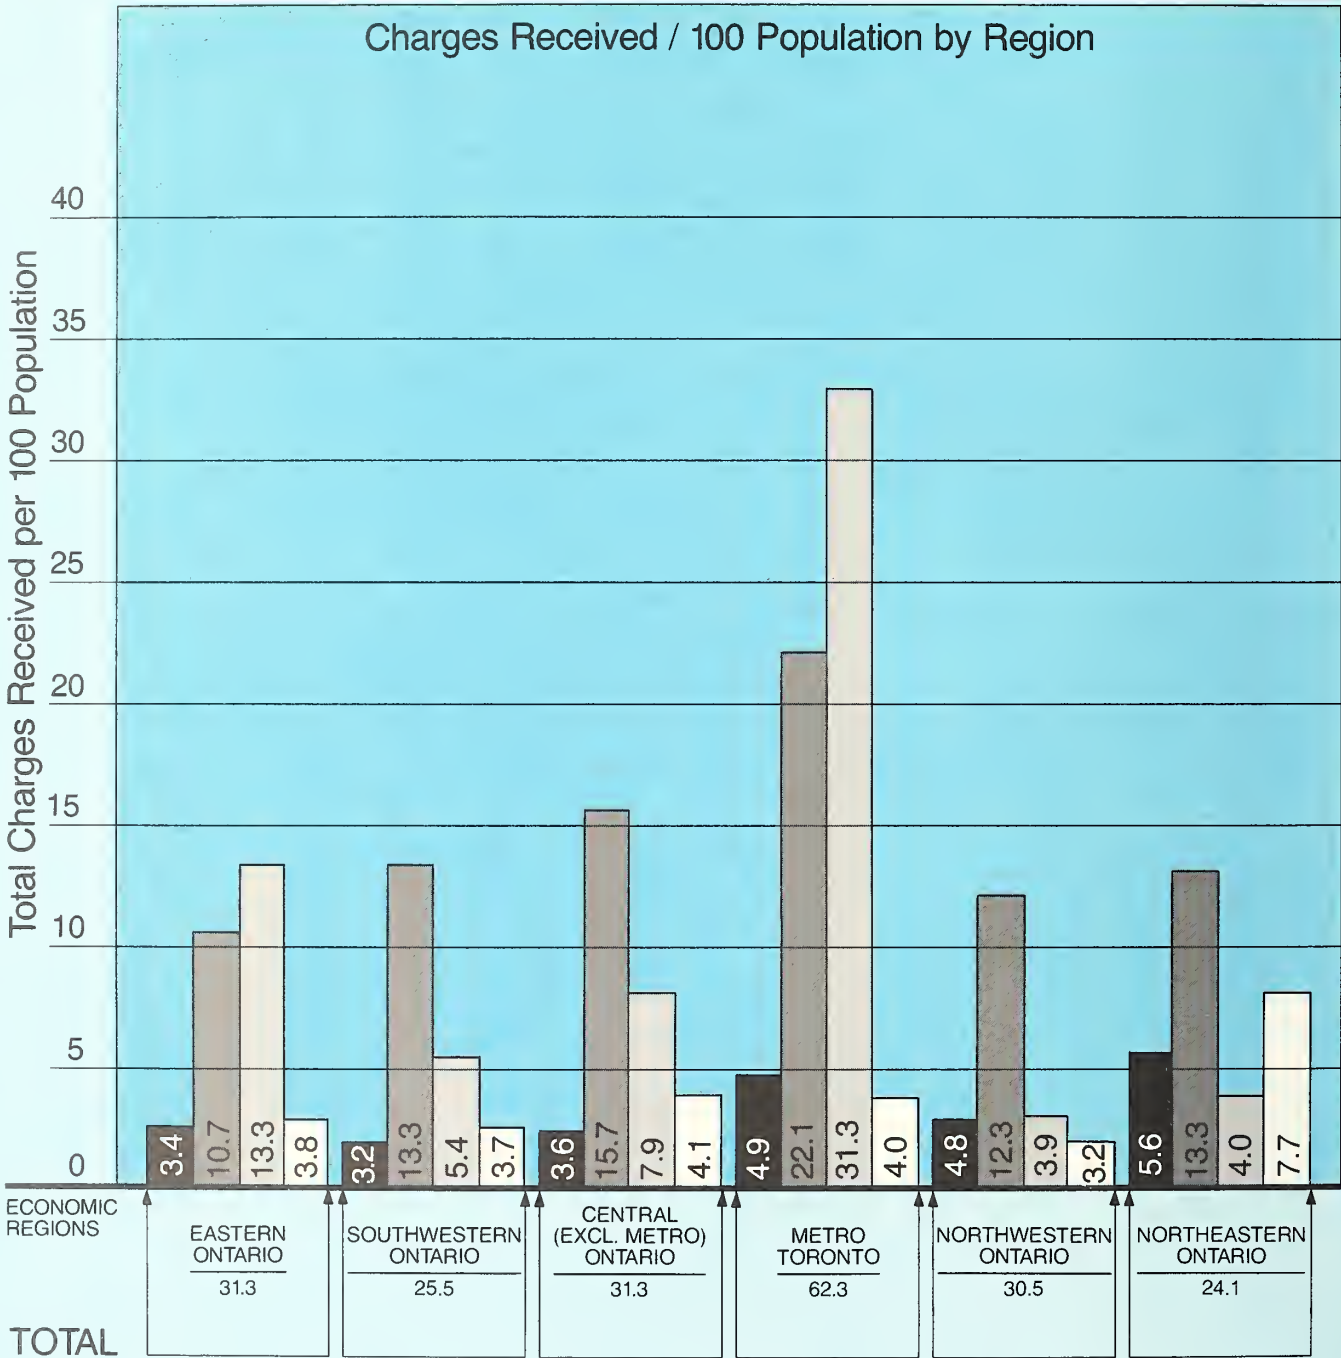

Comparative Rates per 100,000 Population for Property Offences Canada and the Provinces – 1983

Rates of Property Crime per 100,000 Population for Ontario's counties, regions and districts – 1983

Data Collection Procedures and Measurement Problems

The limitations and problems inherent in justice data have been well documented. Ontario is very much concerned about this and has pursued a number of initiatives to come to grips with these long standing and complex problems. In the 1980 edition of this publication it was noted that an important Federal-Provincial initiative was underway to address the state of national justice information and statistics, develop goals and objectives, and chart a path towards their achievement.

The outcome of these efforts, in which Ontario took a lead role, was the establishment of the Canadian Centre for Justice Statistics in Ottawa. Although fully operational for approximately over three years now the Centre and its extensive committee structures have demonstrated progress in improving the timeliness of reporting data and in providing the type of information and statistics needed by the users and producers.

The gaps and limitations in justice data will not be solved easily. Finding solutions will require commitment, patience and skill. It is hoped that the Canadian Centre for Justice Statistics can serve as a vehicle through which significant progress can be made to improve the quality, timeliness and meaningfulness of justice statistics and information throughout Canada.

Meanwhile, as in previous editions, the limitations and gaps in the data presented in the following chapters are identified so that misuses of the data can be avoided.

Problems in the Measurement of Crime in the Community

Variations in police practices can affect the recording of crime in different locations, particularly when multiple offences occur during a given incident or when there is some doubt as to whether or not an actual offence did occur. An extensive body of literature has developed which describes the problems of determining from official police data the real crime rate. Victim surveys across jurisdictions in the United States, including panel studies, offender reports and even participant observation studies, have demonstrated how varia-

tions in police reporting can take place. The 1976 edition of the F.B.I. Uniform Crime Reports lists the following conditions which can affect the volume and type of crime that occurs from place to place.

Density and size of the community population.

Composition of the population with reference particularly to age, sex, and race.

Economic status and mores of the population.

Stability of population, including the impact of commuters, and people who are more transient in their activities.

Climate, including seasonal weather conditions.

Educational, recreational, and religious characteristics.

Effective strength of the police force.

Standards of appointments to the local police force.

Policies of the prosecuting officials.

Attitudes and policies of the courts and corrections.

Relationships between law enforcement agencies and the community.

Attitudes of law enforcement agencies.

Administrative and investigative efficiency of law enforcement, including degree of adherence to crime reporting standards.

Organization and cooperation of adjoining and overlapping police jurisdictions.

Ontario's police statistics are compiled by municipal and regional forces, O.P.P. detachments and the R.C.M.P., and are regularly submitted to the Canadian Centre for Justice Statistics. Traffic offences and accident information are recorded

separately by forces and are not integrated in the totals presented. Both kinds of information are included in this document but are shown separately, thus ensuring consistency with the Centre's records.

All police agencies are required to record their statistics using the same set of rules. These rules are defined by the Uniform Crime Reporting (UCR) system.

The data officially reported to the Centre, and drawn upon for the crime data reported in this document, actually reflect the various stages in the processing of a reported or observed offence. The precise meaning of each term, as used by police, is necessary for interpretations of the data, since "reported offences, for example are not the same as "actual" offences, and neither of these indicators measure the total incidence of crime.

An offence is a breach of legislation under the Criminal Code of Canada, other federal statutes, provincial statutes, and municipal by-laws.

Reported or known offences are recorded by police at the first stage of an investigation, for example, after a citizen reports having been a victim of a crime or having witnessed a crime. Police at the scene of an incident decide how to classify the offence.

Unfounded offences are recorded as such, after police investigate a reported or known offence and establish that an offence did not happen, or was not attempted. An example is an automobile reported stolen but later discovered to be in use by another family member.

Actual offences are those which police determine, after investigation, have actually occurred. (Reported or known offences minus unfounded offences equal actual offences). Whether or not an offence is considered "actual" can be affected by policies and practices of various police forces in the exercise of discretion and record-keeping, particularly when minor offences are involved.

Offences cleared by charge are those for which an information has been laid against at least one person, charging him or her with that offence.

Offences cleared otherwise are those where the offender has been identified, and there is enough evidence to support a charge, but which, for a number of reasons (e.g. person confesses to crime and later dies; sufficient evidence is available but complainant refuses

to prosecute, etc.), do not lead to charges being laid.

Clearance rates are based on the percentage of "actual" offences which are cleared either by charge or otherwise.

Juvenile Offenders are persons under the age of sixteen who are charged by the police or are referred to a prosecutor for a decision on whether to lay a charge, regardless of the decision.

It should be noted that the scoring rules require that police score only the most serious offence relating to any specific incident. Generally, when reporting offences against the person, i.e., murder, attempted murder, sexual offences, assaults, and abductions, only one offence is reported for each victim. The exception is robbery offences. When reporting other offences i.e., breaking and entering, theft, wilful damage, etc., one offence is recorded for each distinct or separate incident. A distinct operation means the same time, location and circumstances.

Problems in Counting and Describing People who go Through the Justice Process

The first official statistics on individuals charged with an offence are provided by police in reports to the Centre. A person is counted by police each time he or she is charged with an offence. Some people may commit a number of offences for which they are charged during a year, particularly offences such as public drunkenness. The total number of persons charged which will be reported, therefore, may involve a large number of repeaters and does not truly measure the number of separate individuals entering the system.

Police reports indicate whether a person charged is adult or juvenile and whether male or female. In many cases, the police will deal with a juvenile offender on an informal basis rather than lay a charge. Between 1974 and 1977, data were collected on the number of juveniles dealt with in this manner. (In these cases the offences are "cleared otherwise"). Commencing in 1978, data were collected on juveniles "not charged" instead of "juveniles informal". The term "juveniles informal" refers to any juvenile who has committed a delinquency and has not been charged, but given an informal hearing in Juvenile Court or handed over to his/her parents or guardian, a social agency or a department concerned. The term "juveniles not charged" refers to any juvenile who has committed a delinquency and has not been charged but referred for decision to a prosecutor or any other designated authority, whether or not an informa-

tion was subsequently laid, or the police have exercised discretion and have decided not to charge.

The reader is cautioned that because of the change in the definition precise comparisons over time may not be appropriate.

Individual descriptive data vary in other parts of the system. The courts do not systematically report the age and/or sex of persons charged. Descriptive data on adults are maintained in more detail once they are placed under the supervision of Correctional Services. However, it is not possible to relate these descriptive data to available statistics provided by police and courts because of the use of different schemes for classifying, the different methods of counting individuals and the time lags which occur as individuals move from one part of the system to another. For example, any person placed on probation in a given year may have been charged one or more years earlier, depending on how long the case took before final disposition.

Until recently, the total number of persons admitted to various jails, adult institutions or placed on parole or probation did not take into consideration that the same person may be admitted more than once in a given year. Data are now available which overcome this problem. It is important to be aware that corrections data, primarily concerning jails, include not only persons who are serving sentences but a large number of persons who are awaiting trial, bail hearings, and so on. Of these, some subsequently will be found not guilty, although they will have been counted as admissions to the provincial jail and correctional system. On the other hand, not every one who is eventually incarcerated has been first committed to jail to await trial. It is necessary, therefore, to take care regarding exactly what population is reported in any table or graph.

Problems in Comparing Data Over Periods of Time or Between Geographic Units

It is necessary that the definition used and the manner of collecting the data be consistent if one is to make comparisons between one period of time and another, or between one jurisdiction and another. It may appear, for example, that dramatic increases or decreases have occurred in specific crime categories when in fact a new law is responsible. Different levels of court use different terms. The Provincial Courts (Criminal Division) use as primary units of analysis "charges received". Other levels of court handling criminal matters use "cases added". The Provincial Courts count names on informations received by the court as "persons charged". If, for example, an individual

is charged more than once during a year, or if an individual is facing two charges written on separate informations, he/she is counted twice. Thus the total number of "persons charged" as reported in court statistics includes individuals who are counted more than once. In addition, the court data do not relate dispositions to specific offences or charges, so it is not possible to obtain full information on sentencing trends for given offence categories and/or types of offenders. (This is discussed more fully in Chapter 6.)

Different circumstances affecting the extent to which the public may report crimes to the police can also influence changes in statistics over time. An example of this can be found in statistics concerning sexual offences. Changes in the law which affect the handling of victims who report sexual offences may account for some portion of any increase in the number of offences reported. Likewise, changes in the use of discretion by police from one time to another can make comparisons over time unreliable. Standardized police reporting methods which have existed for a number of years alleviate some of the problem.

Cross-jurisdictional comparisons are affected by the same concerns. At any given time, police in one location may interpret a given incident in a particular way and conclude that an offence in a certain offence category has occurred, while in other locations there may be a different interpretation placed upon it. For example, the response by police who encounter juvenile offenders may vary depending on, the existence of a police youth bureau, available services in the community, past reactions of local businessmen, the weather, etc. Although attempts have been made to reduce this variation, it can be a factor in different rates of specific types of crimes.

A further jurisdictional problem exists in trying to compare system-wide data by geographic unit. For purposes of this publication, a decision was made to focus on counties as the unit of analysis. With court statistics this was possible because the Provincial Courts (Criminal Division) are organized along county lines, although a court may serve two or more counties. A much larger problem occurs with the police data. The O.P.P. divides Ontario into 16 districts. the R.C.M.P. divides the province into several divisions. The municipal police forces operate within one county only. The corrections data on jails and adult institutions are presented on a regional basis and in terms of specific facilities. These can be further analyzed in terms of counties, if required.

There are also problems with respect to offence definitions. An offence in one jurisdiction may not be an offence in another. Municipal bylaws

and their enforcement vary considerably across the province; provincial statutes vary across the country; and major crime categories vary across national boundaries. This is discussed further in Chapter 4 where the comparisons are limited to categories of greatest reliability, and specific limitations are noted.

Although the problems discussed above have not been fully resolved and create difficulties for

the purposes of interpretation, care has been taken to provide the most reliable data available.

Official sources used for the data are listed in the Appendix following Chapter 9. As official measures of crime and the activity of the system in the administration of justice, these statistics should provide a strong base of information for policy analysis, planning, and research in the justice area.

Justice Expenditures in Ontario

Introduction

The purpose of this chapter is to update at the macro level the publication – Justice Expenditures In Ontario 1979/80, 1980/81 – produced by the Secretariat in 1983. The information will be useful in conjunction with other tables in this publication and will hopefully serve as a useful reference in evaluating cost-sharing arrangements and measuring the effectiveness of various government programs.

The reader is cautioned that the table of major expenditures omits certain expenditures which by their nature are very difficult to collect or would require a complex formula to estimate. For example, it is known that some municipalities spend money on crime prevention programs and victims compensation programs. It was not possible in the time permitted to get an estimate for this spending. Further, there are no estimates for federal government expenditures on other than direct service program. For example, the RCMP expenditures are for policing in Ontario. The expenditures do not include an allowance for headquarters costs which might be attributable to Ontario, since such an estimate would rely on a complex formula which could be open to question. Finally, there are expenditures by Ontario government ministries outside the justice policy field, which have made grants to programs within the policy field. For example, the Ministry of Community and Social Services has contributed monies in support of the Ontario Native Council on Justice, and the Ministry of Health contributes to a grant for the Ontario Coalition of

Rape Crisis Centres. The reader should therefore be cautious when quoting or comparing the data contained in this chapter.

Highlights

- Expenditures on the justice system in Ontario exceeded \$1,956.7 million in 1983/84. This figure compares with over \$1,796.3 million in 1982/83 and \$1,594.8 million in 1981/82. In 1983/84, municipalities paid \$601.4 million or 31% of the total, the provincial government paid \$1,081.6 million or 55% of the total and the federal government paid the remaining \$273.6 million or 14% of the total.
- Between 1981/82 and 1983/84 municipal government expenditures on the justice system increased from \$545.9 million to \$601.4 million – a 10% increase. Provincial government expenditures increased from \$851.7 million to \$1,081.7 million – a 27% increase. Federal government expenditures increased from over \$197.1 million to \$273.6 million – a 39% increase. The largest area of increase for the federal government was adult corrections which increased from over \$99.1 million to \$149.8 million, an increase of 51.2%. The Ontario government's largest areas of increase were policing adult corrections and marketplace regulation. Each increased by over \$50 million over the two-year period. Expressed in terms of percentages these increases ranged from 22.4% to 50.9%.

Comparisons between Ontario Justice Statistics and Statistics from Other Jurisdictions

Overview

This chapter compares “actual” crime in Ontario among Canada’s ten provinces. Further comparisons are made with the United States.

While there are some problems in any comparisons of interprovincial and international crime data due to differences in scoring and classification, such comparisons are most useful in ascertaining trends and major shifts over time. For these reasons, the reader is cautioned about drawing conclusions about based upon superficial data comparisons among jurisdictions.

Highlights

In 1982 and 1983 Ontario’s rates for violent, property and total criminal code offences were (with one exception) lower than those in Canada’s western provinces and higher than those in the eastern provinces. (This trend has been noted in previous editions.) Ontario’s rate for homicide continued to be lower than the national rate and lower than the rates for the western provinces.

In 1982 and 1983 Ontario had the second lowest provincial rate for robbery, breaking and entering, and motor vehicle theft offences. For theft offences Ontario’s rate was only lower than that of the western provinces.

Further Highlights

A. Violent Crimes

Since 1976 the rate per 100,000 population for violent crimes in Ontario increased from 618.7 per 100,000 population to 692.9 per 100,000 population in 1983, an average annual increase of 1.6%. 1977 was the only year when the rate did not increase. These rates compare closely to the national rates which increased from 595.6 per 100,000 population in 1976 to 685.6 per 100,000 population in 1983, an average annual increase of 2.0% per year. Of all the provinces, British Columbia consistently had Canada’s highest violent crime rate, 807.0 in 1976 and 1,050.6 in 1983. Its average annual increase was 3.8%.

B. Property Crimes

Ontario’s rates for property offences increased from 4,685.4 per 100,000 population in 1976 to a rate of 5,512.4 in 1983, a total increase of 17.7% or 2.3% per year. Canada’s rate increased from 4,623.0 to 5,704.6 or 23.4% over the same period. Annually, British Columbia had Canada’s highest rate, 6,604.5 in 1976 and 8,494.1 in 1983.

C. Total Criminal Offences (non-traffic)

Non-traffic Criminal Code offences refer to those offences defined in the Criminal Code of Canada, excluding those relating to motor vehicle traffic. They do not refer to drug or other federal statute offences.

Total non-traffic Criminal Code offences in Canada reached 2,203,668 in 1982 but decreased 2.7% in 1983. Approximately 35% of these were in Ontario. (Ontario had 35% of Canada’s population) In Ontario, however, the number peaked in 1981 at 772,068 and decreased to 764,461 in 1982 and to 745,812 in 1983. This is a 3.4% decrease from the 1981 level.

D. Homicide Offences

Caution should be taken in comparing interprovincial rates for homicides due to the small numbers involved. The national figure in 1983 was 682 homicides, the third consecutive year for an increase. The rate in each of 1981, 1982 and 1983 was 2.7 per 100,000 population. The all time high was in 1977 when there were 707 homicides and the rate was 3.0 per 100,000 population. Ontario had an all-time high of 206 homicides in 1975 and the rate that year was 2.5 per 100,000 population. In 1983 Ontario had 202 homicides, corresponding to a rate of 2.3 per 100,000 population. This was lower than Quebec and each of the western provinces, but the third consecutive year for an increase.

E. Canada-United States Comparisons

Tables 4.3a and 4.3b provide comparisons of Crime under offence rates for selected Canadian and U.S. Regions. For the most part the U.S. classification of offences subsumed under the “crime index” may

differ nominally from the Canadian classifications. The major exceptions to this is the Canadian classification of assault and sexual offences. Data displayed for Canada for 1983 includes all sexual offences and all assaults, except assault level 1. The similar classifications for the United States are forcible rape and aggravated assault. The footnotes to Table 4.3b explain the different definitions.

Ontario's rates for homicide and robbery have consistently been less than the rates in the United States. Rates for breaking and entering have been about three-quarters of the American rate, and rates for theft offences (over \$200 and under \$200) are now running about 10% higher than the overall American rate.

F. Serious Traffic Offences

Since 1976 Ontario's rate for serious traffic offences has been higher than the eastern provinces (except Prince Edward Island) and lower than the western provinces, and has been approximately

the same as the national level. In 1976 Ontario's rate for serious traffic offences was 1,643.3 per 100,000 population. In 1983 the rate was 1,463.5, a decrease of 10.9%. Alberta showed the largest increase over the period, 22.4%.

In Ontario, alcohol related driving offences comprised 35% of this offence category in 1983. This gives rise to a rate of 513.7 per 100,000 population, the second lowest rate of all the provinces. Prince Edward Island, Saskatchewan and Alberta each had rates exceeding twice the Ontario rate.

G. Police Strength

Since 1976, Ontario and Quebec have traditionally had Canada's highest police per population ratio, with rates higher than the national rate. The national rate dropped from 2.20 per 1,000 population in 1976 to 2.11 per 1,000 population in 1983. The main factor contributing to this was a reduction in police per population rates in Western Canada.

Table 4.1a - Trends in the Number and Rate Per 100,000 Population of Actual Offences by Offence Type, Ontario, Selected Provinces and Canada, 1976-83.

Prairies	5,234.3	2.9	8.5	211.3	35.7	1,851.7	2,676.2	448.0	
British Columbia	5,785.8	3.3	15.2	81.4	21.3	1,504.5	3,687.6	472.5	
	7,188.0	3.9	19.6	111.1	20.5	1,918.1	4,628.8	486.0	
U.S.A.									
Northeast	5,553.2	9.1	33.6	231.9	280.8	1,475.2	3,069.8	452.8	
Northcentral	5,295.9	7.4	25.4	348.5	257.5	1,366.0	2,664.3	626.8	
South	4,960.5	6.5	26.7	161.9	206.0	1,248.6	2,926.0	384.8	
West	5,401.3	12.1	36.8	190.6	322.8	1,504.4	2,976.8	357.8	
	6,874.7	9.0	46.0	267.0	331.1	1,841.0	3,865.1	515.5	
New York	6,468.0	11.4	29.2	610.7	338.7	1,671.9	3,025.3	780.8	
California	7,285.5	11.2	50.7	372.1	380.7	2,020.2	3,785.1	665.5	
Michigan	6,784.3	9.1	46.6	271.1	329.7	1,813.1	3,623.1	691.7	

1. Adapted from Comparison of Crime Index Offence Rates, Canada and the United States, 1973, Law Enforcement, Judicial and Correctional Statistics Service Bulletin, Vol. 3, No. 1, May 1975, Statistics Canada.

2. Because it was not possible to subdivide Canadian categories such as assault or even assault causing bodily harm into individual crimes which would be the equivalent of aggravated assault in the United States, caution is advised in making comparisons for this category. The addition of all Canadian cases which would fit into "aggravated assault" would increase the Canadian rates to levels closer to those of the U.S. The total Crime Index for Canada and the provinces would also increase though not enough to affect overall comparisons substantially.

3. Includes Yukon and Northwest Territories.

California	6,677.4	10.5	48.0	373.1	340.9	1,829.1	3,444.5	631.2
Michigan	6,477.5	10.0	56.1	365.3	285.3	1,691.9	3,331.3	737.6
Florida	6,781.1	11.2	48.4	503.7	263.4	1,796.8	3,752.8	404.8

1. Because it was not possible to subdivide Canadian categories such as assault into individual crimes which would be the equivalent of aggravated assault in the United States, caution is advised in making comparisons for this category.

2. In the United States, forcible rape is defined as carnal knowledge of a female forcibly and against her will. Assaults or attempts to commit rape by force are also included; however statutory rape (without force) and other sex offences are not included. Aggravated assault is defined as the unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault is usually accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Attempts are included. In Canada, assault and sexual assault are defined in the same terms as any intentional use of force against another person. Sexual assault is assault involving some form of sexual activity. Assault Level 1 is excluded since it is does not involve weapons.

3. Includes Yukon and Northwest Territories.

Crime and Law Enforcement in Ontario

Overview

This chapter updates the previous edition by presenting final 1982 and 1983 Uniform Crime Reporting Data compiled by Ontario's police forces. The information is displayed in Tables 5.1 to 5.12. Data compiled by the support agencies of the Ministry of the Solicitor General (including the Ontario Police Commission and the Office of the Ontario Fire Marshall) are displayed in Tables 5.9 to 5.13.

On January 4, 1983 new criminal law about assault and sexual offences came into force. Some offences such as rape and indecent assault were redefined; others, such as assault were restructured. More specifically the offence of assault is now defined within three levels. The following is an excerpt from an Information Paper on Bill C-127 produced by the Ministry of Justice.

"The *first level offence*, section 245, known simply as "assault", is a hybrid offence punishable either by summary conviction or by a maximum of five years imprisonment on indictment. An immediate effect will be to permit police officers to arrest battering husbands where they have not in fact witnessed the assault. Section 245.1 is the *second level of assault*; "assault with a weapon or causing bodily harm". Where, in the commission of an assault, the offender carries, uses or threatens to use a weapon or an imitation of a weapon; or where he causes bodily harm to the complainant he is guilty of an indictable offence with a maximum penalty of ten years imprisonment. "Bodily harm" is defined by section 245.1(2) as any hurt or injury to the complainant that interferes with his or her health or comfort and that is more than merely transient or trifling in nature. The most serious assault offence is *aggravated assault*. Section 245.2 provides that where the offender wounds, maims, disfigures or endangers the life of the complainant he has committed an aggravated assault and is subject to a maximum penalty of up to 14 years imprisonment.

The offences of assault causing bodily harm and unlawfully causing bodily harm contained in Section 245(2) are repealed. The new second level assault offence, section 245.1, will provide for the offence of assault causing bodily harm and section

245.3 provides for the offence of unlawfully causing bodily harm with a maximum penalty of up to 10 years imprisonment.

The offence of assault with intent to commit an indictable offence (section 246) is repealed and is not reenacted. Because assault can be proceeded with by way of indictment pursuant to the new section 245 there is no need for this specific offence.

The offence of assault on a Peace Officer engaged in the execution of his duty is retained and has been renumbered, section 246.

The current section 228; to wound, maim, disfigure, endanger life or prevent arrest, with intent to cause bodily harm or involving the discharge of a firearm is amended. The new section 228 includes only the reference to discharging a firearm with intent to wound, maim, disfigure, endanger the life or prevent the arrest of anyone and carries a maximum penalty of 14 years imprisonment".

Sexual assault is described in the same paper as follows:

"Sexual assault would be made a hybrid offence by section 246.1. It is not defined and would be punishable either on indictment by a maximum of 10 years imprisonment or on summary conviction. The second level of sexual assault, indictable and punishable by a maximum of 14 years imprisonment would occur where; a weapon or imitation weapon is carried, used or threatened to be used; where there is a threat of bodily harm of a third party; where bodily harm is caused to the complainant or where there is more than one party to the assault. Thus, where several persons sexually assault a complainant they can be charged with this second level offence. Aggravated sexual assault, the most serious sexual assault offence, occurs where a sexual assault is accompanied by wounding, maiming, disfiguring or endangering the life of the complainant. The maximum punishment is life imprisonment.

The new Section 244 sets out in subsection 3 the factors which vitiate consent to any form of assault, including; the application of force to the

complainant or third party, fraud, threats of force and the exercise of authority”.

Table 4.3b, 5.1b, 5.3 and 5.5a and 5.5b are the ones primarily affected by these changes.

Highlights

- Total offences (non-traffic) which came to the attention of police reached 1,035,858 in Ontario in 1981, but decreased to 1,012,891 in 1982 and to 979,853 in 1983, decreases of 2.2% and 3.3% respectively. Included in these figures are reductions in Criminal Code offences. These decreased 1.0% in 1982 over 1981 and there was a further decrease of 2.4% in 1983. However, violent offences increased both years from 55,929 in 1981 to 57,046 in 1982, and to 61,089 in 1983.
- During the 1960s annual increases in property and violent offences often exceeded 15%. In the 1970s annual rates of increase began declining. More specifically, since 1971 the annual growth rate for violent offences did not exceed 5%, and the annual growth rate for property offences averaged less than 10%. In 1980 and 1981 the lower annual increases which were experienced in the seventies continued for both of these categories. In 1982 and 1983 while violent offences continued to increase, property offences increased marginally in 1982, but decreased in 1983.

A. Ontario-Wide Crime Trends

Tables 5.3(a) to 5.3(h) provide detailed Ontario crime trends from 1962 to 1983 for the following selected offence types: homicide, attempted murder, sex offences, breaking and entering, theft, motorcycle thefts, robbery, fraud and drug occurrences. The purpose for these tables is to enable the reader to better analyze long-term trends within specific offence categories.

The reader is cautioned, however, that changes in legislation, the use of police discretion, and the interpretation of the scoring rules are some of the factors which can influence the amount of “reported crime”.

The following highlights are based on offences classified as “actual”.

- There were 76 HOMICIDES in Ontario in 1962 and the number peaked in 1975 when there were 206 such offences. The number declined to 159 by 1980, but since then the number has increased annually. In 1983 there were 202 homicides.
- There were 21 offences classified as ATTEMPTED MURDER in 1962. Between 1978 and

1982 the number held near the 200 level. In 1983, the number increased 16% to 234.

- There were 2,378 “SEX OFFENCES” (mainly indecent assault) in 1962. By 1982 the number increased to 4,653. In January 1983 legislation was proclaimed which redefined sex offences. That year there were 5,002 such offences.
- In 1962 there were 1,070 ROBBERY offences in Ontario. That figure rose to 5,271 in 1981. In 1982 the number increased 7.1% to 5,646. In 1983 there was a further 3.2% increase to 5,825.
- In 1962 there were 26,987 BREAKING AND ENTERING offences and that figure doubled by 1969 when there were 54,658 such offences. In 1983 there were 108,830 breaking and entering offences, a slight decrease from 1982 when there were 108,940.
- In 1962 there were 87,725 THEFT (including motor vehicle, theft over, and theft under) offences. This figure had increased to 214,675 by 1971 and 337,278 by 1981. In 1982, the number decreased to 336,431 and in 1983 the number decreased to a further 321,038, the lowest since 1979.

Included in this category are motorcycle theft occurrences. In 1974 there were 1,725 such occurrences and by 1983, the number increased to 2,856. Between 1980 and 1983 inclusive the number of such occurrences totalled 11,198. Over this period the number of motorcycle registrations reached 133,300, and averaged 114,000. The number of motorcycle theft occurrences between 1980 and 1983 represented approximately 10% of the average number of registrations.

- In 1962 there were 11,347 FRAUD offences. That figure doubled by 1969 when there were 23,776, and increased to 38,433 by 1980. In 1983 there were 43,845 fraud offences, an increase of 14.1% over 1980.
- In 1962, police in Ontario investigated 264 “actual” drug offences. By 1971 that figure rose to 8,882. In 1980 the number peaked at 29,551 drug offences. Since then the number has decreased annually so that in 1983 there were 17,857 such offences.
- The overall offence rate (including other federal, provincial and municipal offences) has increased 15% from the 1977 level, but has decreased in each of 1982 and 1983.

B. Clearance Rates

- Clearance Rates over recent years have remained fairly stable, with those for violent offences remaining at 77% level, and property offences at the 31% level.

- There has been an increase in the clearance rates for municipal bylaws, with a notable increase in 1978. Clearance rates prior to 1978 were at the 70% level compared with 88% in 1982 and 1983.

C. Crime Trends in the Counties, Regions and Districts

- Comparing Ontario's economic regions in 1983 for total offences (Criminal Code (non-traffic), drug, other federal statute, provincial statute (non-traffic) and municipal bylaw offences), crime rates were highest in the Northwestern Ontario economic region. Ontario's lowest overall crime rate occurred in the Central Ontario economic regions.
- Violent crime rates for 1983 were highest in Northwestern Ontario where the rate was over twice the Eastern Ontario rate of 594.5 offences per 100,000 population. In Northwestern Ontario assaults composed 87% of the total, whereas in Eastern Ontario assaults composed 76% of the total. In contrast, 14% of the violent offences in Eastern Ontario were robberies. The comparative figure for Northwestern Ontario was 4%.
- Specifically in 1983 for the counties, regions and districts, Thunder Bay, Manitoulin, Kent, Brant and Kenora had Ontario's highest violent crime rates with rates in excess of 1000 per 100,000 population. Dundas, Prescott, York, Huron, Grenville, Russell and Wellington had Ontario's lowest violent crime rates, each with rates less than 400 per 100,000 population.
- The property crime rate in 1983 was highest in Rainy River, Thunder Bay and Brant. The lowest property crime rates occurred in York, Huron, Bruce and most of the counties in Eastern Ontario.

D. Crime Trends In Ontario's Largest Cities and Regional Municipalities

The 1982 edition of this publication displayed data for Ontario's largest cities and Regional Municipalities as a rate per 100,000 population. Unfortunately complete population data for these municipalities was not available for 1983, therefore the tables for these municipalities display actual offences rather than the offence rate. The data for municipalities are however organized according to the relative size of the municipalities, in order to make comparisons easier.

E. Traffic Accident and Enforcement Data

- In January, 1978 the reporting criterion for a property damage accident was increased from \$200 to \$400. Between 1978 and 1981 reportable

property damage accidents increased from 122,436 to 129,846 and personal injury accidents have increased from 62,664 to 67,272. By 1983 both categories decreased to 118,222 and 62,735 respectively.

- There were 997 fatal accidents in 1982 and 1,042 in 1983. The highest since 1978 occurred in 1979 when there were 1,316 fatal accidents.
- Rates for driving while impaired offences were lower in 1983 than they were in 1977. The peak occurred in 1981 when the rate was 524.2 such offences per 100,000 population.

F. Police Manpower and Resources

- In 1981 the number of police per 1,000 population in Ontario's counties, regions and districts ranged from 1.08 in Russel County to 3.31 in Kenora District. The provincial rate was 180.8 (excluding the R.C.M.P.). The highest rates in Southern Ontario were in Metropolitan Toronto and Muskoka, where the rates were 2.59 and 2.49 respectively.

G. Citizen Complaints Against Police

- In 1978 a uniform procedure for dealing with citizen complaints against police was established. In 1979 the first full year under the new procedure, there were 3,139 complaints. The number has decreased annually since then so that in 1983 there were 1521 complaints. Data on the disposition of these complaints are found in Table 5.10b.

H. Data on High Speed Police Pursuits in Ontario

- In 1980, the Ministry of the Solicitor General began collecting information on high speed police pursuits. In 1981, the first full year for the collection of such data there were 1,885. The number has decreased annually since then.

I. Fire Incident Data

- Between 1977 and 1983 the number of fire incidents in Ontario decreased from 24,610 to 24,038. The peak occurred in 1977 when there were 26,887 such incidents. Fire deaths decreased by 89 to 149 between 1977 and 1983. The 1983 figures translate to rates of 1.7 fire deaths per 100,000 population and 272.7 fire incidents per 100,000 population, a seven-year low. The per capita fire loss decreased as well in 1983 to \$22.87 in 1983.
- In 1977 the Ontario Fire Marshall investigated 1,844 fires. These resulted in 411 prosecutions. The comparable figures for 1983 were 1,442 investigations resulting in 382 prosecutions.

1. Excludes R.C.M.P., CN and CP Police, and National Harbours Board Police.

2. Includes murder, manslaughter and infanticide.

3. An O.P.P. detachment (Rockland, Port Credit or Burlington) in this municipality also has jurisdiction in a neighbouring municipality. Crime counts for that detachment have been distributed into this municipality based upon the average annual daily traffic volume on the provincial highways policed, or the population policed, by that O.P.P. detachment in this municipality.

1. O.P.P. figures are based on actual strength as of December 31, 1980 and exclude district and general headquarters personnel. Municipal police force figures are authorized police strengths. Data excludes R.C.M.P. and OPP District Headquarters and General Headquarters personnel, as well as CN and CP Police and National Harbours Board Police.

2. Rockland, Burlington and Port Credit OPP detachments each have policing responsibilities in more than one county, region or city. Personnel counts in these detachments were proportioned as follows, based upon the populations and traffic volumes.

- Rockland - 60% to Ottawa-Carlton, 40% to Russell.
- Burlington - 36% to Hamilton-Wentworth, 64% to Halton Region.
- Port Credit - 41% to Peel Region, 59% to Metropolitan Toronto.

Table 5.10b - Disposition of Citizen Complaints Against the Police, 1978 - 1983

		Disciplinary or Corrective Action Taken ¹								
		Resolved	Unfounded	Exonerated	Not Sustained	Sustained ¹	Pending	Charged Under Criminal Code	Charged Under Police Act	Otherwise Disciplined
1978	Disposition of Total Number of Complaints	. . . 2	. . . 2	. . . 2	. . . 2	. . . 2	. . . 2	130	37	102
1979	Disposition of Total Number of Complaints ³	2,008	702	565	665	405	85	103	48	243
1980	Disposition of Total Number of Complaints	2,092	770	518	918	460	178	153	44	291
1981	Disposition of Total Number of Complaints	1,484	797	528	758	353	461	92	53	289
1982	Disposition of Total Number of Complaints	1,328	539	375	874	218	421	19	29	203
1983	Disposition of Total Number of Complaints	506	416	319	288	249	314	15	16	145

... figures not appropriate or not applicable

1. Disciplinary or corrective action is taken when the citizen's complaint is either fully or partially sustained. However, complaints sustained will not necessarily equal disciplinary actions taken since a complaint may involve more than one officer.
2. Because of different recording methods, 1978 data are not comparable with 1979 data.
3. Due to double scoring in many instances, the total of the various dispositions per year will not equal the total number of complaints reported in Table 5.10a. For example, cases may be "Resolved" but also be "Unfounded", "Exonerated" or "Not Sustained".

Court Data

Overview of Contents

A. Provincial Courts (Criminal Division)

There are several courts with criminal jurisdiction in Ontario. The Provincial Courts (Criminal Division) have jurisdiction to try persons charged with most offences created by the Criminal Code of Canada and other federal legislation, and all offences created by provincial legislation. In addition, Provincial Courts hold preliminary hearings in criminal cases to be tried in higher courts. In 1979, the Provincial Offences Court was established to simplify the procedure for prosecuting provincial offences and contraventions of municipal bylaws, thereby dealing with minor offences more efficiently and quickly.

Most of the information presented in this chapter concerns the activities of the Provincial Courts (Criminal Division) and the Provincial Offences Court. The format of this information displays complete data about each jurisdiction on a single table. Data have been added which specifically relate to the Provincial Offences Act. The data were obtained from the Information and Computer Systems Branch of the Ministry of the Attorney General which keeps statistics provided by the Provincial Courts (Criminal Division) on charges received, charges disposed and persons charged during each fiscal year.

Since court data are collected for operational purposes, the units of measurement and categories included are not necessarily comparable to data collected by the police or the Ministry of Correctional Services. Efforts are underway to assure greater compatibility of data in the future.

The court data do provide a complete accounting of all the charges which pass through the courts. Each count of every offence against each person is reported. Charges disposed will not equal the number of charges which were received in a given year because of the time involved between receipt of a charge and its completion. The court data include charges for traffic offences, as well as all other offences. Police, as noted in Chapter 5, report traffic data separately. The "persons charged" data refers to the number of names on the infor-

mations received by the court system. If two charges against one person are received on the same information it is counted as one person charged. If two charges against one person are received on separate informations, it is counted as two persons charged.

B. Other Levels of Court

The person accused of an indictable offence which is not in the absolute jurisdiction of the Provincial Court Judge, and which is not one customarily tried before the High Court of Justice, may elect to be tried before a County or District Court Judge sitting either alone or with a jury.

Where the Judge sits alone, this court is known as the "County or District Court Judges' Criminal Court". Where the Judge sits with a jury, the court is known as "The Court of General Sessions of the Peace". Both courts exist in every county and district in Ontario. The information concerning these courts is presented as a summary of cases added and disposed. It is presented on a regional basis.

The Supreme Court of Ontario is made up of the High Court of Justice and the Ontario Court of Appeal. The High Court of Justice has jurisdiction to try any indictable offence. All criminal trials in this Court are heard by a Judge of the High Court, sitting with or without a jury. The vast majority of offences tried in the Court are the most serious offences, crimes against persons. In 1983/84 there were 262 criminal matters disposed in the High Court of Justice. This is down from 304 the previous year. More details about activities in this court are available from the Information and Computer Systems Branch of the Ministry of the Attorney General.

Data on cases added and disposed in the Court of Appeal for Ontario are summarized in this chapter. In the appropriate circumstances, appeals may be taken to the Court of Appeal for Ontario by persons convicted of indictable offences. Similarly, an appeal may be launched by the Attorney General for the Province against an acquittal or, occasionally, against a sentence a convicted person received for an indictable offence. Those persons convicted of summary offences created by federal

statutes may appeal either by way of a stated case to the Supreme Court of Ontario or by way of a new trial in the County or District Court, and in each instance thereafter to the Court of Appeal with leave of that Court on a question of law.

Highlights of the Data

- The total charges received in Provincial Courts decreased from a high of 4,541,086 in 1981/82 to 3,303,622 in 1983/84. The decrease can be accounted for mainly by a clear-up of a backlog of "municipal bylaw" charges in Metropolitan Toronto.
- In general, most totals for Ontario have shown decreases during the 1981/82 and 1983/84 periods. Indeed, some of the decreases are quite large both in terms of percentage decrease and absolute numbers. For example, charges received for liquor offences decreased from 174,991 to 146,112 a decrease of 28,879 or 16.5%. Similarly charges received for drug offences have decreased from 27,126 to 17,945, a decrease of 9,181 charges or 33.8%. Charges received for Highway Traffic Act Offences decreased from 1,613,106 to 1,404,750, a decrease of 13%.
- Looking at the rates for charges received per 100 population (see page 00) for Ontario's regions, in 1983, Metropolitan Toronto had the highest rate of over 60 charges received per 100 residents (i.e. over 60%). Contributing to this high rate were the high level of Highway Traffic Act and municipal bylaw charges received.
- In 1983/84 Provincial Courts in Metropolitan Toronto received, 1,332,523 charges, 40.3% of all charges received by the Provincial Courts. Peel Region Provincial Courts were second highest with 220,012 charges or 6.7% of the total.
- With respect to the County Court Judges, Criminal Court, "cases added" on a province-wide basis increased from 2,645 to 6,311 between 1978/79 and 1982/83, a 139% increase. In 1983/84 there were 6,111 cases added, a 3.2% decrease over the previous year. Dispositions during 1983/84 decreased by 6.8% from 6,405 in 1982/83, to 5,967.
- On a province-wide basis, the County and District Courts, General Sessions of the Peace showed increases in caseload both over the long term and the short term. The number of cases added increased from 2,999 in 1977/78 to 6,134 in 1983/84. In 1982/83 there were 5,315 cases added.

1. "Persons Charged" as used in this table, and as defined by the Ontario Ministry of the Attorney General, refers to the number of names on the informations received by the court system. If two charges are received against one person on one information, it is counted as one person charged. If two charges against one person are received on two separate informations it is counted as two persons charged. These data include traffic offences, and hence are not comparable to police data on persons charged as reported to Statistics Canada.

2. Charges received include every count received by courts.

3. Charges disposed include charges transferred to other provincial court jurisdictions, withdrawal/dismissals, convictions and sentences, preliminary hearings committed or discharged, and prepaid fines.

Source: Court Statistics Annual Report, Ministry of the Attorney General, published by the Information and Computer Systems Branch.

NOTE: The statistical form was revised in April 1978. Figures since 1978/79 and 1979/80 under "Tried" and "Guilty Plea" represent the counts of an offence, not the number of cases. Therefore, 1978/79 and 1979/80 figures under Tried and Guilty Plea are not comparable to previous years' data.

- 1. Data for the district of Kenora not available for fiscal years 1978/79 and 1979/80.
- 2. Data for York for the period January 1977 to March 1977 not available.
- 3. Data for county of Prescott and Russell not available.
- 4. Data for the district of Algoma not available.
- 5. York Region did not report in 1983/84.
- 6. Includes cases disposed by way of trial, guilty plea, issued bench warrant and re-election.

Source: Court Statistics Annual Reports, Ministry of the Attorney General, published by the Information and Computer Systems Branch.

Adult Corrections Data

Background

The primary function of correctional services is to carry out sentences handed down by the courts. Both the federal and provincial governments share this responsibility. The federal government has responsibility for persons sentenced to two years or more, the provincial government for persons sentenced to less than two years.

Provincial adult correctional services in Ontario are provided by the Ministry of Correctional Services. The federal services are provided by Correctional Services Canada.

The services to juveniles (under the age of sixteen) are provided by the provincial Ministry of Community and Social Services (see Chapter 9).

A. The Ontario Ministry of Correctional Services

The Ministry of Correctional Services is responsible for all persons in Ontario 16 years of age and over who are, placed on probation, remanded in custody for trial or sentence, or sentenced incarceration up to two years.

The overall goal of this Ministry is to protect the public while at the same time to assist and encourage offenders to develop and maintain responsible and acceptable behaviour within the community. To this end, a number of different programs have been developed. Some of these are lifeskills, academic and trades training, work experience, counselling programs, recreational and volunteer programs, employment training programs, community service order and restitution projects, pre-trial services programs, native offender programs, victim-offender reconciliation programs and volunteer programs. Readers should refer to the Ministry of Correctional Services Annual Report for a more complete list.

Ontario operates three basic types of correctional institutions: jails and detention centres, correctional centres and treatment facilities. In addition, Ontario contracts with many community agencies or groups to operate community resource centres (halfway houses).

Jails and detention centres are all maximum security institutions. In general, they house inmates awaiting trial, sentencing, or appeal. In addition, they house those being held for immigration hearings or for deportation, those serving very short sentences, those awaiting transfer to federal institutions or provincial correctional centres, and those awaiting remands for psychiatric examination.

Correctional centres are institutions designated to hold inmates with longer sentences. Typically, an inmate with an aggregate sentence of 30 days or longer is classified and assigned to a correctional centre. These institutions have a diversity of programs and activities not normally available in a jail or detention centre. Inmates are assigned to a correctional centre based upon an assessment of their security needs. Millbrook is a maximum security institution; Guelph, Maplehurst and Mimico hold medium security inmates; Monteith, Burtch, Rideau and Thunder Bay, are minimum security institutions. The Vanier Centre for Women has all three levels of security accommodation.

There are two treatment facilities in Ontario, the Guelph Assessment and Treatment Unit, and the Ontario Correctional Institute. The Guelph Assessment and Treatment Unit (GATU) provides psychiatric assessment and treatment for male offenders referred from any provincial facility. After assessment, inmates may; (1) be returned to the referring institution with recommendations for treatment; (2) be committed to an Ontario psychiatric facility; (3) be kept on as patients at GATU; or (4) be provided with out-patient care while staying in the Guelph Correctional Centre.

The Ontario Correctional Institute in Brampton consists of an assessment unit and a treatment unit. Admission to a treatment unit may be directly from the assessment unit or by referral from other correctional institutions. Here teams of correctional workers, psychiatrists, psychologists, social workers, chaplains, medical staff and recreation specialists work together to design treatment programs for chronic alcoholism, drug abuse, sexual maladjustment and other problems.

Some inmates are allowed to serve part of their sentence in a Community Resource Centre

(CRC). These residences are operated by private agencies in communities throughout the province. The majority of those housed in CRCs are sentenced inmates approved for temporary absence from provincial institutions. In most cases, these residents are working, attending school, or seeking work. Other residents of the CRCs may be there as a condition of probation, parole or pre-trial release.

Under the Temporary Absence Program, any inmate may apply for an absence from an institution in order to take part in rehabilitative programs or for humanitarian reasons. Such an absence may be for a few hours or may involve longer periods of time.

B. Correctional Services Canada

Correctional Services Canada is responsible for administering 1) court sentences with respect to offenders sentenced to custody for two years or more, and 2) the decisions of the National Parole Board affecting the release of offenders on full parole, day parole, mandatory supervision and temporary absence. The service is organized into three levels, National, Regional and Institutional. The National office is located in Ottawa, the Ontario Regional Office is located in Kingston, Ontario. The Regional offices are primarily concerned with the co-ordination of program implementation and the effective use of resources in the operating units under their control.

In Ontario, the Service operates 14 correctional institutions including three community correctional centres. In addition the Service has several parole offices.

Upon entry into the federal correctional system and after initial security classification and placement have been determined, the inmate is assigned to a case management team consisting of a supervisor, a classification officer, a parole officer, and, possibly, psychologists, security officers or medical staff. This team together with the Case Management Division of CSC develops and co-ordinates a program plan for each inmate, from admission to final release. The case management approach, is governed by a principle which states that an inmate should not be held in a more secure environment than potential risk necessitates. Once placed, inmates may be transferred to another facility of a different security level. The major steps involved in the case management process are: classifying and placing offenders; preparing individual program plans, monitoring and assessing progress against program plans; recommending transfers on early releases; and supervising inmates released on parole unit sentence expiry.

Until the early 1970s, the concept of rehabilitation dominated correctional philosophy. How-

ever, because of questions raised about the appropriateness of this approach by various authorities, including commissions and study groups, it has given way to alternative approaches. An opportunities model that emphasizes the role of corrections in administering fairly and humanely the sanctions imposed by the courts and, at the same time, providing inmates with opportunities for self-improvement and preparation for their reintegration into society has been adopted. A variety of social programs such as counselling, conditional releases and a series of industrial, agricultural, forestry and other in-house work programs are available. Some offenders are allowed, through day parole provisions, to hold outside jobs as part of their correctional program.

C. The National Parole Board

The National Parole Board is an independent agency within the federal Ministry of the Solicitor General. The major function of the Board is to serve as a national body devoted to making decisions on the granting or refusal of parole, day parole, unescorted temporary absences and revocation of parole and mandatory supervision. It has jurisdiction over all inmates serving sentences in federal institutions.

Offences Categorization

Offences leading to admissions are grouped into broad categories traditionally used by the Ministry. Those offences not easily falling into a category are labelled *not categorized*.

Many single admissions are for multiple offences. *Most serious offences* represent an attempt to label each admission with only one offence category. In Table 7.4, each admission is counted once in the category of offence considered most serious. The categories are listed in descending order of seriousness.

Highlights of the Data

- The total days stay of inmates in provincial institutions in 1983/84 was 2,361,990 days. This was an increase of 7.4% over 1981/82.
- Between 1981/82 and 1983/84, the number of jail and detention centre admissions increased 3.9% from 65,576 to 68,138; the number of sentenced inmates increased 12.0% from 44,867 to 50,248. The number reached 52,491 in 1982/83. The number of persons who were placed on probation decreased 8.4% from 31,665 to 28,997.
- Between 1973/74 and 1983/84 admissions to Ontario's jails and detention centres increased from 56,072 to 68,138. This is a 21.5% increase. Over

the same period the number of persons sentenced to a term of imprisonment increased 55.3% from 32,363 to 50,248.

- In 1983/84 the number of sentenced admissions in Ontario decreased in comparison to the previous year. The main reason for this was a reduction in the number of admissions for miscellaneous criminal code liquor offences and drug offences. At the same time there was an increase in the number of sentenced admissions for violent offences and alcohol related traffic offences.
- With regard to persons placed on probation, in 1983/84 3,685 of the persons placed on probation had committed a violent offence. This is 13.5% of the total and is an increase from the 9.9% rate in 1981/82. Persons placed on probation for a property offence amounted to 17,240 that year, or 63.0% of the total. Persons placed on probation for traffic liquor or municipal by-law offences amounted to 7.2% of the total.
- In 1983/84 15,915 or 39.4% of the persons sentenced to imprisonment were between 19 and 25 years of age inclusive; 2,648 or 6.6% were between 16 and 17 inclusive. Comparable figures for probation were 35.7% and 21.3% respectively.
- In 1977/78 the average total inmate population in provincial institutions was 5,540. That number grew to 6,528 by 1982/83, but decreased in 1983/84 to 6,454. The increase occurred in the jails and detention centres where the average daily population increased from 2,640 in 1977/78 to 3,663 in 1983/84. Over the same period the average daily count in the correctional centres decreased from 2,621 to 2,463.
- It is important to keep in mind that looking at average counts masks the extent of crowding in two ways. Seasonal and day-to-day fluctuations mean an institution which averaged well below capacity, may be extremely crowded at certain times of the year. In addition, certain regions of the province are much more crowded than others. In 1981/82 the average inmate population represented about 92% of the operational capacity of the jails and detention centres. However, that year there were over 111,000 days stay by inmates when institutions exceeded the operational capacity and inmates were not provided a permanent bed. (In such an instance a mattress on the floor is usually used.)
- In 1983/84 the average daily cost to keep an inmate in a jail or detention centre in Ontario was \$73.16. This is an increase of 9.5% over the 1982/83 cost of \$66.80. In 1983/84 the costs ranged from \$43.41 per day in the Metro Toronto West

Detention Centre to \$161.02 per day in the Fort Frances Jail. These variations can be explained by the fact that the Metro Toronto West Detention Centre is a large capacity institution and hence fixed administration and labour costs can be averaged over a larger number of inmates. In contrast the Fort Frances Jail is the smallest of Ontario's jails, but it still requires a certain minimum staff to operate the jail.

- Per diem costs in 1983/84 for correctional centres varied from \$54.43 per inmate for the Mimico Correctional Centre to \$156.95 per inmate in the Vanier Centre. Program and administration costs in relationship to the number of inmates are the main factor in explaining the large difference in costs.
- In 1982/83 the Ministry of Correctional Services contracted with 32 Community Resource Centres (CRCs) with a total capacity of 432 inmates. In 1983/84 the Ministry contracted with 33 CRCs with a total capacity to handle 473 inmates. The average weekly count increased from 415 to 434, a 5% increase.
- The number of long term temporary absences activated peaked at 4,913 in 1979/80. The number decreased to 3,874 in 1982/83 and increased to 4,287 by 1983/84. The success rate since that time has consistently been over 93% and in 1983/84 reached 97.7%.
- The number of short term temporary absence peaked in 1981/82 at 15,190 when the success rate was 97.8%. The number decreased to 12,277 in 1983/84 and the success rate for that year was 98.1%.
- In 1983/84 the number of paroles effected by the Ontario Board of Parole reached 3,609, an increase of 59.8% over the 1981/82 figure of 2,259. The success rate increased from 67.9% to 77.2% over the period.
- In 1973/74 the inmate population of federal institutions in Ontario was 2,676. By 1977/78 it had dropped to 1,822. For the next four years the number remained relatively constant at the 2,400 level. In 1982/83 the number increased to 2,890 and in 1983/84 it reached 3,148, a 22.6% increase since 1981/82. The number of admissions showed a similar percentage increase.
- In total in 1983/84 there were 4,059 warrant of committal admissions into the federal corrections system in Canada. Of these the largest offence category was robbery for which there were 1,022 admissions. Murder, attempted murder and manslaughter accounted for 426 admissions and sex offences accounted for 379 admissions.

- There were 11,875 inmates in the custody of Correctional Services Canada in 1983/84. Of these 3,158 were in custody for robbery, 2,304 were in custody for murder, attempted murder or manslaughter, and 1,938 were in custody for breaking and entering offences.
- In 1983/84, 19-24 year olds represented 536 or 34% of the admissions to federal institutions in Ontario; 25-34 year olds represented 39% of the admissions.
- In 1979/80 there were 2,396 inmates on register with Correctional Services Canada in Ontario. The number rose to 3,164 by 1983/84. Over the period the total not in custody increased from 228 to 366. This was 9.5% of the total in 1979/80 and 11.6% in 1983/84. The main reason for the increase is the increased use of community residential centres and day parole.
- In 1979/80 there were 322 admissions to federal custody in Ontario resulting from revocation of parole or mandatory supervision. In 1983/84 there were 388 admissions due to revocation of parole or mandatory supervision. This represents a 20.5% increase.
- In 1979/80 there were 1,123 releases from federal custody in Ontario, 979 of these were into parole or mandatory supervision. This was 87% of the total. In 1983/84 there were 1,169 releases to full parole or mandatory supervision. This was 90% of the total.

1. Until March 31, 1978 the Ontario Board of Parole dealt only with those serving a definite plus an indefinite sentence. On April 1, 1978 the Ontario Board assumed responsibility for parole for all inmates sentenced to provincial institutions.
2. Paroles effected are those initiated during the fiscal year, though the application may not necessarily have been made in that same year.
3. Parole completions were not necessarily effected in the same year.

Data Concerning Consumer and Commercial Relations

Background

Statistics presented so far concentrate on the criminal justice system and offences under the Criminal Code, federal and provincial statutes and municipal bylaws. Additional data, concerning commercial activities and consumer rights, are provided by the Ministry of Consumer and Commercial Relations, the fourth ministry in the justice field. Although activities in this area do not enter the justice system unless charges are laid after investigation, the process does correspond to aspects of law enforcement and the maintenance of economic and social order.

The Ministry, with its more than 70 Acts, registers and licenses sections of the business community, sets standards of conduct and provides consumer protection by prohibiting a range of undesirable practices. The emphasis is on consumer information and advice. The approach in regard to complaints is conciliatory in the first instance. Sanctions, such as cease and desist orders and prosecution, proceed if corrective actions are not taken.

Complaints rarely require punitive action, considering the number of commercial transactions under Ministry jurisdiction. Most are successfully mediated by the Ministry, and in cases of consumer dissatisfaction with a product or service, recourse is often obtained through alternatives such as the Better Business Bureau or the party supplying the goods or service. These would not be officially recorded.

Overview of Contents

While the Ministry has 15 separate divisions, commissions and agencies, statistics included in this publication deal with three areas – the Ontario Securities Commission, the Business Practices Division and the Financial Institutions Division.

A. Ontario Securities Commission

The Commission's responsibility in its administration of the legislation and through the policies developed in the exercise of the discretion vested

through the legislation, is to assure both a reasonable standard of fairness and an equality of opportunity for access to information for all investors in the securities/commodities marketplace. It also is responsible for maintaining and fostering investor confidence in the capital markets in Ontario.

It administers the Deposits Regulation Act, the Securities Act, the Toronto Stock Exchange Act, and the Commodity Futures Act. The Commission's activities include the registration of all dealers, salesmen and advisors in the Ontario securities/commodities marketplace. It has the power to investigate, suspend and cancel registration in cases of improper conduct.

B. Business Practices Division

The Business Practices Division promotes a high level of conduct in the marketplace. The means it uses are: formal and informal liaison; working closely with industry associations and consumer groups to respond to consumer complaints; anticipation of problems in the marketplace; and enforcement of legislation. The scope of the Division is broad, covering virtually every transaction in the marketplace through the 13 Acts under its mandate. (See Table 8.3). The table relating to the activities of this Division has been changed slightly. It was felt that the new information represents the activities of the Division in a more accurate and meaningful manner. For example, the previous use of the ratio "Actions Taken Per 1000 Registrations" was felt not to be meaningful.

C. Financial Institutions Division

The Financial Institutions Division monitors the financial stability and organizational structure of insurance companies, trust companies and loan corporations incorporated under the laws of Ontario. The Division also oversees the Motor Vehicle Accident Claims Fund, Credit Unions and the regulation of Cemetery Boards. It ensures that those who work in these industries are knowledgeable, competent and trustworthy and that the industries concerned are operated in the best interests of the public, with full and proper disclosure. The table relating to this Division has been changed in this

edition since inaccuracies were found in the data in previous editions. The new table provides more details about the types of institutions monitored and the way matters have been dealt with by the Division.

Highlights of the Data

- Table 8.1 shows trends in registrations, written complaints and actions taken by the Ministry through the Financial Institutions Division.
- Between 1982/83 and 1983/84 there has been little change in the number of registrants and licencees. Financial institutions incorporated in Ontario increased from 1,842 to 1,865, and financial institutions incorporated in other jurisdictions decreased from 485 to 484. With regard to written complaints, those which dealt with insurance companies decreased from 1,761 to 1,567 while those which dealt with trust companies increased from 193 to 242.
- Table 8.2 deals with the Ontario Securities Commission. Registrations have continued to in-

crease steadily since 1977/78 reflecting the active capital markets of Canada, primarily centered in Ontario. Actions commenced under the Securities Act have remained relatively constant since 1978. The only exception to this occurred in 1982/83 when the number increased from 31 to 61. In 1983/84 the number decreased to 25.

- Table 8.3 details the registrations relevant to the Acts administered by the Business Practices Division for which prosecutions are possible. In some cases, institutions or agencies are registered as well as, or instead of, individuals.
- Since 1981/82 there has been a continued increase in the total registrations under the Bailiffs Act, the Consumer Protection Act (Itinerant Sellers), the Real Estate and Business Brokers Act and the Travel Industry Act. There was no significant increase in the number of written complaints received relating to any of the Acts administered by the Division, and the number of prosecutions increased only under the Consumer Protection Act, the Consumer Reporting Act and the Business Practices Act.

Data Concerning Juvenile Offenders

Overview

This chapter updates data which first appeared in the 1982 edition. The information relates to the Juvenile Delinquents Act as the Young Offenders Act, (passed in July 1982) was not proclaimed until April 2, 1984. Although Ontario is well into implementation of the Young Offenders Act, data presented here is important because it provides insight into the types of criminal activities 7 to 15 year olds are involved in and it provides a basis for comparing the new Young Offenders Act with the old Juvenile Delinquents Act. For example some tables provide, for 12 to 15 year olds, information on the types of crimes they are involved in, the way they are dealt with by the courts, and how the cases are disposed. This will be important for comparative purposes as information under the Young Offenders Act becomes available.

Highlights

A. Trends in Juvenile Offenders (known to police)

- Between 1974 and 1983 the number of juvenile offenders (aged 7-15) who came to the attention of police in Ontario increased marginally from 68,531 to 68,942. More specifically, juvenile offenders for violent offences increased from 3,015 to 4,604; juvenile offenders for property offences decreased from 37,467 to 35,732; and juvenile offenders in total for non-traffic criminal code offences increased from 54,047 to 55,480. Each of these categories increased between 1982 and 1983.
- Expressed in terms of juvenile offenders per 100,000 juveniles aged 7-15, between 1974 and 1983, the rate for violent offences increased from 227.6 to 395.4; the rate for property offences increased from 2,828.3 to 3,069.0; and the rate for all non-traffic criminal code offences increased from 4,079.9 to 4,765.1.
- The years between 1978 and 1982 was a period of relative stability in terms of the number of juvenile offenders. In 1983 however the number of offenders increased so that numbers are back

near the levels incurred in the period between 1974 and 1976.

B. Trends in OPP Prosecutions of Juveniles and 16 and 17 Year Olds

- Between 1976 and 1983, for each age category there was a reduction in the number of juveniles and 16 and 17 year olds prosecuted.

C. Juvenile Offenders Known to Police by County, Region, District and City

- Between 1982 and 1983, the number of juvenile offenders who came to the attention of the police for criminal offences increased in some municipalities and decreased in others. Municipalities where there was a notable increase are Northumberland, Metropolitan Toronto and Waterloo Region. Municipalities where there was a notable decrease are Sudbury, Algoma, Durham Region, Hamilton-Wentworth, Middlesex and Niagara Region.

D. Trends in Court Activities Under the Juvenile Delinquents Act

- The number of charges received and disposed under the Juvenile Delinquents Act has decreased annually since 1980/81. Similar trends have occurred with the number of Court Orders relating to the Juvenile Delinquents Act. Of particular note is the reduction in court orders dealing with training schools and probation.

E. Statistics Canada Data on Juvenile Court Appearances

Statistics Canada data reflects the same trends as shown in the court data. This is contrary to that shown by police data. A possible explanation for the discrepancy is that the police data includes juveniles dealt with but not charged. It is possible that police are dealing with more juvenile matters on an "informal" basis.

F. Trends in the Number of Committals to Ontario's Training Schools

- Since 1976 there has been a significant decline in the number of committals to Ontario's Train-

ing schools. In 1976 they were 800 committals. In 1983 there were 478 committals. While the number of committals for violent offences has remained approximately the same, the number for property offences has dropped from 528 to 325 and the number for provincial statute offences has dropped from 101 to 20. The change between 1982 and 1983 was minimal.

G. Committals to Training School and Children Placed on Probation

- In 1983/84 fifteen year olds accounted for 238 of Ontario's 508 committals to training schools. This represents 47% of the admissions. Fifteen year olds also formed the largest age group of children placed on probation, 2,236 of the 5,462 in total. This represents 41% of the total.

1. The difference between the Ministry of the Attorney General figures and Statistics Canada figures is explained by the fact that data on Table 9.5 represent charges laid, and the above data represent appearances in court. One appearance could be made in response to more than one charge.

2. These figures are a reflection of court activity, and hence some juveniles may have been counted more than once.
